## About us

As one of the oldest faculties at UGM, Faculty of Pharmacy has a long history of graduating alumni with excellent performances in the area of pharmacy. A wide range of alumni workplace covers community pharmacies/drug stores, primary healthcare, hospitals, pharmaceutical and herbal industries, non-government organizations (NGOs) and government bodies.

The Faculty of Pharmacy continuously maintains its tradition by graduating students with qualifications to study and work abroad. It has been awarded/accredited by various international organizations, i.e. ISO, AUN, ASIIN. This ensures its global quality. This year the Faculty of Pharmacy launched its IUP to fulfil the global need of citizens that can work across borders. In recent years, many Indonesian pharmaceutical companies are expanding overseas. Vice versa, many international companies (pharmaceutical industries or hospitals) are trying to enter Indonesia to compete for the Indonesian market. Thus, it is important to provide higher education of pharmacy targeting globally-oriented student.

The IUP Pharmacy is an integrated part of an undergraduate pharmacy program in the Faculty of Pharmacy UGM. It adopts outcome-based education to ensure its graduate quality. Its graduates are set to have the ability to pursue a further career in clinics, industries, or laboratories.

## International exposure

The IUP Pharmacy students are expected to attend a mandatory exchange program for (1)-6 months at international partner universities. The program will include attending regular classes or participating in research assignments under joint supervision between UGM and partner universities. The students are also encouraged to attend international short programs (3-4 weeks), including attending lecture series, summer courses, conferences, or seminars.

## Facilities

The IUP Pharmacy is supported with modern classroom, integrated research laboratory, greenhouse, laboratory animal handling unit, green zone, sports center, student account, computer center, and software for research and education. Its teaching staff are graduates from top international universities with good English communication skills

## Eligibilities
